

# Manufacturer Climate Action Program (MCAP)

## MCAP EXPRESSION OF INTEREST FORM

Climate change is an urgent issue that must be addressed by us in order to prevent further damage and protect the planet. There is no way that a single individual or company could accomplish this alone. *We need to tackle this on a large scale in order to combat it, and this will require a collective approach from a wide range of industry stakeholders to work together in order to redefine the market. So Cascale launched the **Manufacturer Climate Action Program (MCAP)** is a pivotal initiative that unites manufacturers worldwide to combat climate change. As an integral part of the Cascale's [Decarbonization Program](#), **MCAP welcomes Cascale members and non-members** alike, with a primary objective to accelerate the adoption of science-aligned targets for Scope 1 and 2 emissions. Are you interested in participating in this program and making a positive contribution to the environment? Please fill out and submit the below form. We will contact you shortly.*
